

Project 13:

BootStrap Oriented Project

In this project the goal is to continue developing the website you started with Practice Project 11.

In your website, I now want you to add:

- A popover
- A carousel under the navigation bar
- Add an accordion
- Add a number of images that when clicked they are displayed in a modal
- In one page add a scrollspy. Suggestion: in “about us” page, add a sticky listgroup with names of employs, when a name is clicked body scrolls to section with a small cv of each employ.

Also, I would like you to take a look at the php course we did, and get a good understanding of what we saw...
