Project 2: Personal portfolio page

In this project, you shall create an html web page containing the standard information for you and for your work.

What is needed:

- Include your image and your name: style your image with css effects as well as your name.
  - The image will be in a local directory with relative path,
  - It must have a caption and some text in order to be displayed in case the image cannot be loaded
- Include a div with some text inside about yourself, a paragraph, and style with css. Use span somewhere in this paragraph

<u>Use different divs in your page for sections:</u>

- EDUCATION
  Use a list here and style it as you wish

- WORKING EXPERIENCE
  - ➢ Use table here like that

Date from – Date to	Location	Company	Position	Description

  - ➢ If there is no actual experience leave it empty or put some imaginary exp.
- HARD-SKILLS
  Use a list here and style it as you wish

- SOFT-SKILLS
  Use a list here and style it as you wish

- LANGUAGES
  Use a list here and style it as you wish

Moreover, there needed a list with references to all sections within the page, something like the image below.

Aristea Kontogianni

Experience | Education | Interests | Contact

Requirements:
- ➢ Use internal, inline and external css.
- ➢ Use appropriate headings, font-family, font-sizes, colors (text and background)
- ➢ Create an appropriate folder structure to support your web page
- ➢ All links to resources should be with relative paths
